

What kind of facial do you need?

This November at Pax we have added a new facial to our menu to better meet the individual needs of our clients. Justine - our resident Esthetician and one of our Massage Therapists - is excited to work with you and our new products to customize the facial for your specific skin's needs. This article will educate you on what kind of facials we offer and help you determine what kind of facial to book for your skin type. You can also have Justine do a skin analysis upon your arrival to determine which treatment will work best for the results you are looking for.

Our newest facial offering is called the *Customized Deep Pore Facial*. This treatment is great for anyone with imperfect skin as it targets breakouts, dehydration, fine lines and many other skin problems. The Customized Deep Pore Facial starts with a cleansing exfoliation, and then a steam; it includes extractions and a facial massage and finishes with a peel off mask. You will have a choice between two different peel off masks: one is an *anti age mask* that contains Vitamin C that aids the stimulation of collagen synthesis and helps with exfoliation. The other peel off mask is a *renewal mask*. It contains atomized seawater rich in trace elements and mineral salts. It renews skin cells by stimulating cell vitality and healing. Come in and try it out!

Our most requested facial is the *Pax Signature Hydration Facial*. This facial is designed for people who need intense hydration and a moisturizing treatment. If you have dry or sun damaged skin, or have any concerns regarding aging, than this is the right facial for you. It is also a beneficial treatment for those diagnosed with eczema or dermatitis. Your skin is cleansed, ampoules are applied for collagen synthesis and to improve the skin's elasticity, and you can relax and unwind as your skin is gently massaged and steamed. A collagen mask followed by a paraffin mask finishes off this luxurious and highly beneficial facial.

Our *Oxygen Facial* is perfect for anyone who is acne prone. This facial is an extremely therapeutic treatment. It simulates and revitalizes the skin, leaving a youthful glow. It also lightens and brightens the skin to naturally reduce hyperpigmentation, commonly known as dark spots. The tonic used in the oxygen facial clarifies, lightens, and disinfects the complexion, along with increasing microcirculation and prepping the skin for optimum oxygen absorption. The Q10 ampoule stabilizes and improves the skin's own repair mechanism and treats existing atrophies, clears blemished skin and boosts collagen formation, deep cleanses, combats the appearance of fine lines and wrinkles, hydrates and oxygenates the skin and promotes the skin's own regeneration. The balancing thermo gel mask helps tone the epidermis while making the skin glow and reducing any sebum imbalances.

In addition to the facials offered at Pax, we also have facial add-on's, such as a glycolic peel, collagen eye mask and waxing. We have a solution for all skin types, and you are guaranteed to leave with glowing skin - so book a facial today and start your holiday season off with glowing skin!
